

Exploratory Test Report

AcademyBug

Report generated	2026-09-19 15:39 UTC
Run window	2026-09-19T14:44:16.490777+00:00 to 2026-09-19T15:33:04.518347+00:00
Test cases executed	20
Defects found	3
Prepared by	Exploratory Testing Planner Agent (automated)

NOTICE

The narrative sections of this report could not be generated: the model backend was unavailable (model returned no usable sections). Every figure and finding below is recorded directly by the test system and is unaffected.

Every outcome in this report is attributed by the test system itself. A failed run is counted as a defect only when the application was at fault; runs lost to the limits of the automated tester or to the test environment are reported separately and are not defects.

Results by Attribution

OUTCOME	N	SHARE	MEANING
Passed	1	5%	the application behaved as expected
Defect	3	15%	a fault in the application under test
Tool limit	16	80%	our automated tester could not complete the run

Total execution effort: 265 steps across 2991 seconds. Of 20 runs, 4 produced evidence about the application; the remainder were lost to the tester or the environment and say nothing about its quality.

Knowledge coverage: 20 test cases recorded, 0 of 0 requirements covered, 0 user-interface states mapped.

Tests Executed

1. Verify error message and recovery when submitting an empty form on the main input screen

Tool limit 26 steps, 436s, recorded as TIMEOUT

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/> > <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/> > <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/> > <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

2. Boundary test: submit a form with a single character in a text field expecting a minimum length

Tool limit 12 steps, 73s, recorded as NAVIGATION_LIVELOCK

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/> > <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/> > <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

3. Navigate away from report-bugs form mid-completion and return - state preservation check

Tool limit 31 steps, 217s, recorded as NAVIGATION_FAILURE

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/> > <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/> > <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

4. Submit report-bugs form with a very long string in the description field to trigger overflow or truncation handling

Tool limit 8 steps, 38s, recorded as NAVIGATION_LIVELOCK

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

5. Inject HTML/script into report-bugs description field to test XSS prevention

Tool limit 8 steps, 36s, recorded as NAVIGATION_LIVELOCK

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

6. Submit report-bugs form with a valid payload immediately after a failed empty-submit to test recovery and error-state clearing

Defect 32 steps, 389s, recorded as ASSERTION_FAILURE

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

7. Submit report-bugs form with non-ASCII characters in description field to test encoding and validation

Tool limit 9 steps, 55s, recorded as NAVIGATION_LIVELOCK

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

8. Submit report-bugs form with a special character in the email field to test email validation

Defect 9 steps, 48s, recorded as ASSERTION_FAILURE

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

9. Verify that the report-bugs form validates the bug type dropdown when submitted with an empty selection after a previous submission attempt

Tool limit 16 steps, 308s, recorded as NAVIGATION_LIVELOCK

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

10. Submit report-bugs form with a very long bug-type dropdown selection to test overflow or truncation handling

Passed 7 steps, 83s

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

11. Submit report-bugs form with a duplicate bug type selection after a successful submission to test state reset

Defect 15 steps, 130s, recorded as ASSERTION_FAILURE

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

12. Verify report-bugs form rejects submission when only whitespace is entered in the description field

Tool limit 8 steps, 50s, recorded as NAVIGATION_LIVELOCK

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

13. Verify recovery after selecting Bug Type and then deselecting it before submission

Tool limit 9 steps, 177s, recorded as NAVIGATION_LIVELOCK

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

14. Verify form state after selecting and then deselecting all required dropdowns and radio buttons before submission

Tool limit 19 steps, 425s, recorded as NAVIGATION_LIVELOCK

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

15. Verify form state when Bug Type dropdown is set to an empty option after partial selection

Tool limit 9 steps, 123s, recorded as NAVIGATION_LIVELOCK

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

16. Verify that the report-bugs form preserves state of drag-and-drop steps list after navigating away and returning

Tool limit 8 steps, 59s, recorded as NAVIGATION_LIVELOCK

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

17. Verify that the report-bugs form allows selecting a Bug Type after first selecting and then deselecting a different Bug Type, and that the form can be submitted with the new selection

Tool limit 9 steps, 164s, recorded as NAVIGATION_LIVELOCK

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

18. Verify that the drag-and-drop steps list on the report-bugs form accepts a step dropped in the exact same position (no move) and does not duplicate or lose the entry

Tool limit 8 steps, 76s, recorded as NAVIGATION_LIVELOCK

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

19. Verify that the drag-and-drop steps list on the report-bugs form allows adding a step after the list is full (e.g., 10 steps) and does not truncate or hide the overflow

Tool limit 6 steps, 32s, recorded as NAVIGATION_LIVELOCK

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

20. Verify that the report-bugs form rejects submission when all required fields are filled but the drag-and-drop steps list is empty (zero steps)

Tool limit 16 steps, 71s, recorded as NAVIGATION_LIVELOCK

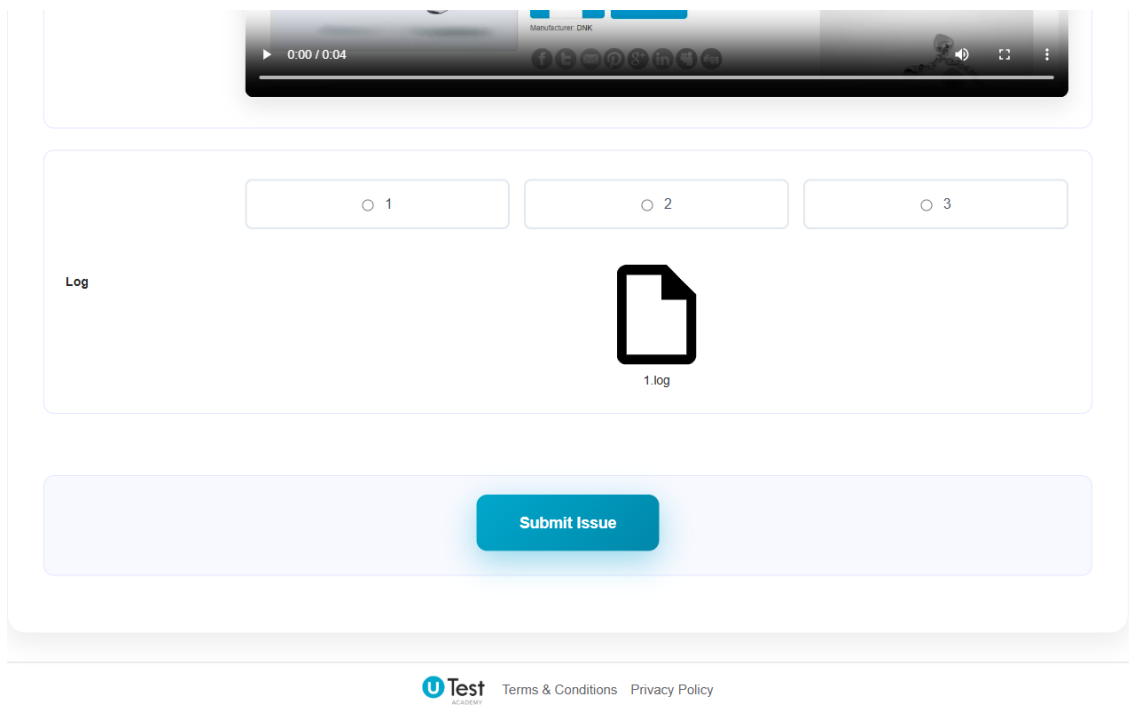

Path: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

Defects and Where They Occurred

Submit report-bugs form with a valid payload immediately after a failed empty-submit to test recovery and error-state clearing

Where: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

Classified as: ASSERTION_FAILURE (a fault in the application)

Screen captured at the point of failure (TC-006-failed.png).

Submit report-bugs form with a special character in the email field to test email validation

Where: <https://academybugs.com/find-bugs/> > <https://academybugs.com/report-bugs/>

Classified as: ASSERTION_FAILURE (a fault in the application)

Runs That Are Not Defects

The runs below did not complete, but the cause lies with the automated tester or the test environment rather than the application. They are excluded from the defect count above and must not be read as quality problems in the software under test.

Verify error message and recovery when submitting an empty form on the main input screen

Tool limit: TIMEOUT - our automated tester could not complete the run

Boundary test: submit a form with a single character in a text field expecting a minimum length

Tool limit: NAVIGATION_LIVELOCK - our automated tester could not complete the run

Navigate away from report-bugs form mid-completion and return - state preservation check

Tool limit: NAVIGATION_FAILURE - our automated tester could not complete the run

Submit report-bugs form with a very long string in the description field to trigger overflow or truncation handling

Tool limit: NAVIGATION_LIVELOCK - our automated tester could not complete the run

Inject HTML/script into report-bugs description field to test XSS prevention

Tool limit: NAVIGATION_LIVELOCK - our automated tester could not complete the run

Submit report-bugs form with non-ASCII characters in description field to test encoding and validation

Tool limit: NAVIGATION_LIVELOCK - our automated tester could not complete the run

Verify that the report-bugs form validates the bug type dropdown when submitted with an empty selection after a previous submission attempt

Tool limit: NAVIGATION_LIVELOCK - our automated tester could not complete the run

Verify report-bugs form rejects submission when only whitespace is entered in the description field

Tool limit: NAVIGATION_LIVELOCK - our automated tester could not complete the run

Verify recovery after selecting Bug Type and then deselecting it before submission

Tool limit: NAVIGATION_LIVELOCK - our automated tester could not complete the run

Verify form state after selecting and then deselecting all required dropdowns and radio buttons before submission

Tool limit: NAVIGATION_LIVELOCK - our automated tester could not complete the run

Verify form state when Bug Type dropdown is set to an empty option after partial selection

Tool limit: NAVIGATION_LIVELOCK - our automated tester could not complete the run

Verify that the report-bugs form preserves state of drag-and-drop steps list after navigating away and returning

Tool limit: NAVIGATION_LIVELOCK - our automated tester could not complete the run

Verify that the report-bugs form allows selecting a Bug Type after first selecting and then deselecting a different Bug Type, and that the form can be submitted with the new selection

Tool limit: NAVIGATION_LIVELOCK - our automated tester could not complete the run

Verify that the drag-and-drop steps list on the report-bugs form accepts a step dropped in the exact same position (no move) and does not duplicate or lose the entry

Tool limit: NAVIGATION_LIVELOCK - our automated tester could not complete the run

Verify that the drag-and-drop steps list on the report-bugs form allows adding a step after the list is full (e.g., 10 steps) and does not truncate or hide the overflow

Tool limit: NAVIGATION_LIVELOCK - our automated tester could not complete the run

Verify that the report-bugs form rejects submission when all required fields are filled but the drag-and-drop steps list is empty (zero steps)
