Findings

MAJOR Quantitative Analysis button does not open analysis form

Clicking the 'Quantitative Analysis' control did not open an analysis form; the UI remained on the My Projects screen instead. The evidence shows the app stayed on the projects list and the sidebar button is still present without any form UI appearing.

Expected Clicking 'Quantitative Analysis' would present a quantitative analysis form (a dedicated form UI) instead of remaining on the projects list.

Actual After clicking, the app remained on the 'My Projects' screen with project list items visible and no analysis form elements displayed; the 'Quantitative Analysis' button is still shown in the sidebar.

MAJOR Clicking 'Quantitative Analysis' does not open the Quantitative Analysis view

The tester clicked the 'Quantitative Analysis' sidebar button but the app remained on the 'My Projects' screen; the Quantitative Analysis view did not open.

Expected Clicking the 'Quantitative Analysis' button in the sidebar opens the Quantitative Analysis tool/page.

Actual After clicking, the interface remained on the 'My Projects' screen; the Quantitative Analysis view did not appear.

CRITICAL Notifications control is missing from workspace header

The recorded UI elements for the workspace do not include any notifications control (e.g., a bell icon or 'Notifications' button), so the expected control is not visible.

Expected A notifications control (for example, a bell icon or a button labeled 'Notifications') should be visible in the workspace header.

Actual No notifications control is present in the reported UI elements; only language, user avatar, collapse sidebar and other buttons are listed, with no notification element identified.

MAJOR Quantitative Analysis sidebar button did not open analysis area

The tester expected the Quantitative Analysis area to open, but the final screen still shows the My Projects view instead, indicating the app did not navigate to the analysis area.

Expected Selecting the 'Quantitative Analysis' button in the sidebar should navigate to or open the Quantitative Analysis area/interface.

Actual After attempting to click 'Quantitative Analysis', the UI remained on the My Projects screen (heading 'My Projects' and project list visible); the Quantitative Analysis area did not appear.

Test cases

TEST CASE	VERDICT	EPOCH
Shared projects and surveys are separated The Collaborations section displayed both controls for Collaborated Projects and Collaborated Surveys as expected, and the Collaborations view is shown.	Passed	1
Collaborations opens from the sidebar The Collaborations view opened when the sidebar button was clicked; the UI shows the Collaborations heading and the Collaborations sidebar item is focused.	Passed	1
A template can be shared The My Templates view shows a Share control on a template, meeting the expectation that a share option is offered.	Passed	1
An existing template can be edited The My Templates view displays an Edit control for a template, satisfying the expectation that a saved template is editable.	Passed	1
Templates are explained The My Templates view includes a visible control that explains what templates are, satisfying the expectation.	Passed	1
A template can be created The My Templates view opened and the 'Create template' control is present as expected.	Passed	1
My Templates opens from the sidebar	Passed	1

The My Templates view opened; the final screen shows a 'My Templates' heading and related template content.

The analysis screen offers a way back The Qualitative Analysis screen includes a visible back control, so the user is not stranded.	Passed	1
An existing codebook can be continued The Qualitative Analysis section includes an explicit option to continue from a previously downloaded codebook, so the expectation was met.	Passed	1
A new qualitative analysis can be started The Qualitative Analysis section opened and the interface shows an option to start a new analysis.	Passed	1
Qualitative Analysis opens from the sidebar The tester clicked the sidebar item and the Qualitative Analysis section opened; the page shows the expected 'Qualitative Analysis' heading.	Passed	1
An analysis form is presented Clicking the 'Quantitative Analysis' control did not open an analysis form; the UI remained on the My Projects screen instead. The evidence shows the app stayed on the projects list and the sidebar button is still present without any form UI appearing.	Product failure	1
Quantitative Analysis opens from the sidebar The tester clicked the 'Quantitative Analysis' sidebar button but the app remained on the 'My Projects' screen; the Quantitative Analysis view did not open.	Product failure	1
Questions can be selected in bulk The Question Bank opened and a select/multi-select control is visible, matching the expectation.	Passed	1
Questions can be filtered The Question Bank opened and the Filters control is visible on the screen.	Passed	1
Questions can be sorted The Question Bank shows a sort control with options for newest, oldest, and alphabetical orders, satisfying the expectation that ordering is supported.	Passed	1
Question search offers an advanced mode The Question Bank page displays an 'Advanced Search' control as expected.	Passed	1
Questions can be searched The Question Bank shows a search field matching the expected 'search by type, tag or owner' functionality.	Passed	1
Question Bank offers curated questions The Question Bank shows a visible 'Curated Questions' control after opening, meeting the test's expectation that a curated control is present rather than a blank page.	Passed	1
Question Bank opens from the sidebar	Passed	1

The Question Bank was opened from the sidebar and the page shows a 'Question Bank' heading, matching the expectation.

Every workspace section is listed All expected workspace section buttons are present in the sidebar on the final screen.	Passed	1
Notifications are reachable The recorded UI elements for the workspace do not include any notifications control (e.g., a bell icon or 'Notifications' button), so the expected control is not visible.	Product failure	1
The sidebar can be collapsed The sidebar shows a visible 'Collapse sidebar' control, satisfying the expectation that a collapse control is offered.	Passed	1
Pre-release status is disclosed The UI displays a visible 'Beta' label on the projects screen, matching the expectation that the beta status is disclosed.	Passed	1
The product identifies itself The product name 'DataGhurhi' is present on the final screen.	Passed	1
The signed-in account is identifiable The screen shows a user-related control in the header (a button labeled "J" and the user name "Mohiuddin"), which satisfies the expectation that the signed-in account is identifiable.	Passed	1
A language control is offered A language control is visible in the header as a button showing a flag emoji.	Passed	1
Global search can be narrowed by type The UI contains a scope control offering the options Project, Survey, and Account, so the expectation is satisfied.	Passed	1
Global search is always available The header contains the global search field for projects, surveys and accounts as expected.	Passed	1
A project shows when it was last touched The screen shows a project entry with a visible date, satisfying the expectation that at least one project entry shows a date.	Passed	1
Sort direction can be reversed The screen shows both ascending and descending sort options, satisfying the test objective.	Passed	1
Projects can be sorted by several fields The Sort control displays multiple options and includes both 'Title' and 'Research Field', satisfying the expectation.	Passed	1
Projects can be filtered by privacy	Passed	1

The UI shows a 'Privacy:' control and the options include 'Public' and 'Private', matching the expectation.

Projects can be searched The project list shows search inputs, so the expectation that a field for searching projects is visible is satisfied.	Passed	1
The workspace explains its purpose The workspace includes explicit explanatory text describing its purpose, matching the expectation for informing a first-time user.	Passed	1
Creating a project is offered The UI shows a 'New Project' button, satisfying the expectation that the primary action is offered immediately.	Passed	1
Projects workspace renders The expected 'My Projects' heading is visible on the final screen, indicating the projects workspace rendered for the signed-in user.	Passed	1
Quantitative Analysis opens from the sidebar The tester expected the Quantitative Analysis area to open, but the final screen still shows the My Projects view instead, indicating the app did not navigate to the analysis area.	Product failure	1
The workspace explains what it is for The workspace page includes copy that describes managing/organizing research projects, which matches the expectation.	Passed	1
A language control is offered The header includes a visible language control (flag button), satisfying the expectation that a language selector is present.	Passed	1
Collaborations opens from the sidebar The Collaborations view opened and displays collaboration-specific UI, matching the expectation that selecting Collaborations reaches shared work.	Passed	1
My Templates opens from the sidebar The sidebar 'My Templates' selection opened the templates area as expected: the screen shows templates-specific headings, a Create template button, and a listed template.	Passed	1
The signed-in account is identifiable The header shows a user control identifying the signed-in account (an initial-avatar button and the account name), satisfying the expectation.	Passed	1
Question Bank opens from the sidebar The UI shows the Question Bank screen and its controls after clicking the sidebar item, matching the test's expectation that Question Bank content appears.	Passed	1
Project list offers sorting and privacy controls The screen shows both a 'Privacy:' label and a 'Sort:' label, plus corresponding controls for filtering and sorting.	Passed	1

Projects dashboard renders for a signed-in user Both expected UI elements are present on the final screen: the 'My Projects' heading and the 'New Project' button were visible.	Passed	1
Workspace navigation offers every section The sidebar displays the requested sections: 'My Projects', 'Question Bank', and 'Quantitative Analysis'.	Passed	1
Projects dashboard renders for a signed-in user The final screen shows the 'My Projects' heading and the 'New Project' button as expected.	Passed	1
Survey editor field type availability All expected question type options are present in the editor's 'Select the type of question you want to add' section. 3 attempts	Passed	1
Data persistence on refused survey submission The test run was cut short (capped) before a submission attempt or rejection occurred, so persistence after a failed submission could not be verified. 4 attempts	Stopped by a cap	2
Visibility of saved statistical reports The test run was terminated (ran out of budget) before the tester could confirm the presence of saved analysis reports. The final screen shows the 'Saved Files' item focused but no list of saved reports was observed.	Stopped by a cap	2
Mobile responsiveness check at 375px width The captured UI shows the dashboard rendered with headings, search fields, buttons, nav items and a project entry, and the only scrolling noted is vertical. There is no evidence of horizontal overflow or unusable controls at the tested viewport.	Passed	1
Verify availability of analysis and reporting modules The final screen shows the analysis routes and their module titles, satisfying the expectation that analysis-related routes are accessible and render their titles. 3 attempts	Passed	1
Data persistence on failed survey submission run stopping (accepted without judging: no evidence to weigh) 3 attempts	Skipped	2
Verify saved analysis reports listing run stopping (accepted without judging: no evidence to weigh) 3 attempts	Skipped	2
Qualitative analysis of free-text responses run stopping (accepted without judging: no evidence to weigh) 2 attempts	Skipped	2

Create a custom template from an existing project	Passed	1
A native alert stating 'Project created successfully' was shown, which supports that the project was created and the template-save operation completed as expected.		
2 attempts		
Modify and persist project metadata	Passed	1
The updated description is displayed on the project page after saving, indicating the change persisted.		
5 attempts		
Survey view accessibility and navigation	Passed	1
The survey view is visible and the UI contains a navigation control to return to the main projects/dashboard area.		
Project title XSS sanitization check	Passed	1
The page displays the script tags as literal text in headings/buttons and there is no evidence of script execution (no alert dialog).		
Project title XSS sanitization check	Skipped	1
run stopping (accepted without judging: no evidence to weigh)		
2 attempts		
Personal Storage list rendering	Skipped	1
run stopping (accepted without judging: no evidence to weigh)		
2 attempts		
Verify UI control state and data persistence after navigation	Skipped	1
run stopping (accepted without judging: no evidence to weigh)		
Survey template edit persistence	Skipped	1
run stopping (accepted without judging: no evidence to weigh)		
2 attempts		

Agent reliability

Reported deliberately. These are the results we got wrong ourselves, and a reader who cannot see them cannot weigh the rest.
